Taking utility to the next level, by design

In addition to impressive lift capabilities, greater transmission controls and power output, the Series 6 tractors are equipped with deluxe operator amenities. With cabins that provide lasting comfort, these tractors also promote operator productivity and accelerate project completion.

Featuring models capable of reaching speeds as low 0.1 mph (0.2 kmph), this series demonstrates effectiveness in applications where high-impact results need to be made in fewer passes, such as trenching. The high-efficiency, liquid cooled engine allows for less than 10% drop off from the front to the back of the tractor. Combined with a large volume fuel tank, this tractor is ready to take on any time-intensive, heavy-duty application, productively and cost-effectively.
